MEMORANDUM

TO: Hospital EMS Contacts

FROM: Liza Burrill, NREMT-I, Education Coordinator

RE: Suggested Curricula

DATE: January 30, 2003

The New Hampshire Emergency Medical Services Medical Control Board has approved the release of the 2003 New Hampshire Local Options Protocols, which are being sent to you as part of this mailing. Within this revision are two new protocols that include an expanded scope of practice for EMTs:

- ☐ Advanced Spinal Assessment - Suspected Spinal Cord Injury Protocol - 4.8
- ☐ Anaphylaxis - 2.2

In anticipation of adoption of one or both of these protocols in your local catchment area, we have included the NH Bureau of Emergency Medical Services (EMS) suggested training curricula for both the Advanced Spinal Assessment and the Anaphylaxis Protocols. If you adopt one or both of these protocols, you are welcomed and encouraged to use all or part of these training curricula, or establish one of your own. These curricula are intended to be support material for training the EMT providers in your area.

If you have any questions, need further information, or would like assistance in the delivery of one of both of these curricula, please don't hesitate to be in contact with Education Section personnel at 1.888.827.5367.
